

The 1st Organic Yun Angelica Forum in 2022

Swiss Chinese Herbal Medicine and Functional Food Innovation Center

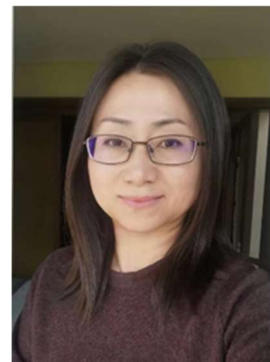

Zurich, Switzerland
(SwissHerbs.Org)

1.Aim

Chinese herbal medicine industry is one of the key industries for building world-class "green food brand" in Yunnan province. The planting area and output of Chinese herbal medicine in Yunnan province have ranked first in China for many consecutive years. Angelica is a traditional Chinese large medicinal material and an important export medicinal material. Since ancient times, there has been a saying of "For ten prescriptions, nine of them with Angelica". Angelica is a holy and important medicine for gynecology, and has been highly recognized in the global Chinese market. Yunnan is the second largest production area of Angelica in China and it is looking forward to innovating the cooperative research and development mode of the whole industry chain through the cooperation among Chinese and Swiss industries, universities and research parties. Concentrating on promoting the improvement of Yun Angelica organic technology and standard → Yun Angelica's organic base construction → Yun Angelica's organic brand building → Yun Angelica's organic professional team cultivation → international organic market expansion", in order to provide a good example of reference value for traditional Chinese medicine to go abroad.

2.Lecturers

Research fellow Wang Xin: female, born in 1979, member of the Communist Party of China, master's degree. She is the science and Technology commissioner of Yunnan Province, the training object of Technological innovation talents of Yunnan Province, and an expert of Yunnan Association of Chinese Medicinal Materials Cultivation.
